

SAMPLE MEASURING INSTRUCTIONS - VERSION WITH A DECORATIVE FRAME

1. Please measure dimensions **A** and **B** inside the heater edges: "from-to".
2. Dimension **B** should be confirmed in several places to check that the heater is even along its entire length. If necessary - use less value.
3. Dimension **C** (height of rung) should not be greater than the edge of the heater.
4. Dimensions: **AxB**, will be **internal dimensions** to which we will adapt our products. Give us the **AxBxC** dimension for the valuation.

IMPORTANT! In this version, please specify the internal dimension and our team will calculate the L-frame and grille dimensions. The grille in this version is 6mm shorter and narrower than the version without L-frame.

More information about L-frame: www.reiker.pl/EN
in products -> accessories.

"L-frame" type
Optional:
20x20x2mm
20x8x1,5mm
14x10x1,5mm
